

Multi Wavelength needs/contacts

Assignment – each science group should provide Peter and the MW Coordination Group (Dave Thompson as representative) with a prioritized list of science topics needing MW support, including justification and specific examples. Needed soon (by end of September?).

Gino Tosti is working with P. Giommi on a draft plan concerning contemporaneous/simultaneous MW observations, which will strongly draw from the “Science Goals”.

Also needed – spreadsheet of all MW resources, linked to the science topics, with contact information. See example spreadsheet. Propose to post this to the MW Confluence page to be available to the LAT Collaboration as a resource. Send information to Dave Thompson.

Science Need	Wavelength band	Time scale				Facility	Facility contact	LAT contact	Resource needed	Note/Details
		Pre-launch	Survey/Followup	Contemporaneous	Simultaneous					
Blazar Variability monitoring	Optical/INIR/Radio	X	X	X	X	WEBT	Massimo Villata	Gino Tosti	Post-doc	Consortium of Observatories
	Optical/INIR	X	X	X	X	REM	Emilio Molinari	Gino Tosti		60 cm telescope (La Silla)
	Optical/INIR	X	X	X	X	LIVERPOOL	Carole G. Mundell	Gino Tosti		200 cm telescope (La Palma - Spain)
	Optical	X	X	X	X	PERUGIA-AT	Gino Tosti	Gino Tosti		40 cm telescope (Perugia)
	Radio/optical			X	X	EVN Bordeaux	P. Charlot	Benoit Lott		VLA 60 cm telescope

This table is placed on the Confluence page (Multiwavelength Activities Related to GLAST's Blazars)
