

- 1) **DC2**: kickoff meeting between February 17 and March 1
- 2) “**ScienceTool Checkout3**” **data set** corresponding to a 55 day-long observation is available: 3EG catalog including 105 variable blazars+500 steady blazars+GRBs+7 pulsars...

- 3) **LAT performance** with respect to blazar studies  
Flux and index resolution as a function of time,  
index, (l,b)....

Work in progress, slight problem with offsets

- 4) **Performance page**:

[http://www-glast.stanford.edu/software/glast\\_performance.htm](http://www-glast.stanford.edu/software/glast_performance.htm)

What information do we require?

Ex: sensitivity as a function of (b,l)...
